

In order to still better meet the needs of its customers, **Coris BioConcept** proposes a new range of products: the "**C**ompact **I**ndividual **T**est" range.

The **CIT** line contains 20 strips individually packed in pouches, and supplied without any additional material. This new range is rather intended for laboratories already provided with the required material to perform the tests, but which do not realise tests often enough to use the STRIP range (25 strips in a tube).

Coris BioConcept put then from now on 3 ranges of products at its customers' disposal:

- **STRIP range:**

- * 25 tests in one tube
- * Intended to big laboratories owning already all the material required and performing regularly tests

- **UNI-STRIP range:**

- * 10 tests individually packed
- * 10 tubes
- * 1 tube rack
- * Sample taking systems
- * Intended for small labs or doctors' offices which are not provided with the required material and which perform tests from time to time

- **CIT range:**

- * 20 tests individually packed
- * Intended for laboratories performing a small quantity of tests and already fitted with the material needed

SUMMARY:

	CIT	STRIP	UNI-STRIP
Strip Test in tube	X	25	X
Individual Strip Test	20	X	10
Dilution in dropper	YES	YES	YES
Tubes, rack, sample tacking system	NO	NO	YES

With this new range of products, **Coris BioConcept** covers henceforth all the requests of its customers as regards packaging.

For any special offer regarding our **CIT range**, please contact your Export Manager in **Coris BioConcept**.

Regards,

Coris BioConcept's Team
