## Company Profile

Coris BioConcept is a leading expert in the field of immunochromatographic (IC) and oligochromatographic (OC) technologies. Based in Belgium and established in 1996, the company develops, produces and markets rapid diagnostic kits for the detection of human respiratory and gastro-enteric infectious pathogens (bacteria, viruses and parasites) and for the detection of antibiotic resistance markers (RESIST range). These rapid tests are extensively used in microbiology laboratories worldwide.

To complement this extensive range of fast and accurate lateral flow tests, the company has developed an innovative fully automated platform that performs multiplex PCR amplification and detection on a microfluidic cartridge (TRAPIST® system). This molecular multiplex platform allows syndromic diagnostic approach for the clinical management of main human infections and resistance to antibiotics.

Coris BioConcept is continually involved in collaborative projects with Belgian and European Research Institutes, laboratories and companies for the development of breaking new solutions.

This R&D expertise is ideally suited for “on-demand” production of innovative solutions in a rapidly changing world that calls for cutting edge biotechnology to take us forward into a healthy future.

All Coris BioConcept’s products fulfil the CE marking requirements and the company is also certified ISO 13485.
