

Rapid • Electrochemical • Detection

BL-RED Test

Our solution for the early detection of
third-generation cephalosporins hydrolysis

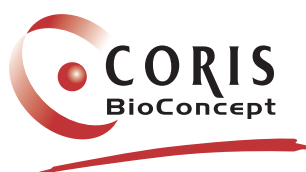

Rapid screening of 3GC hydrolysis from your primary cultures!

Advantages

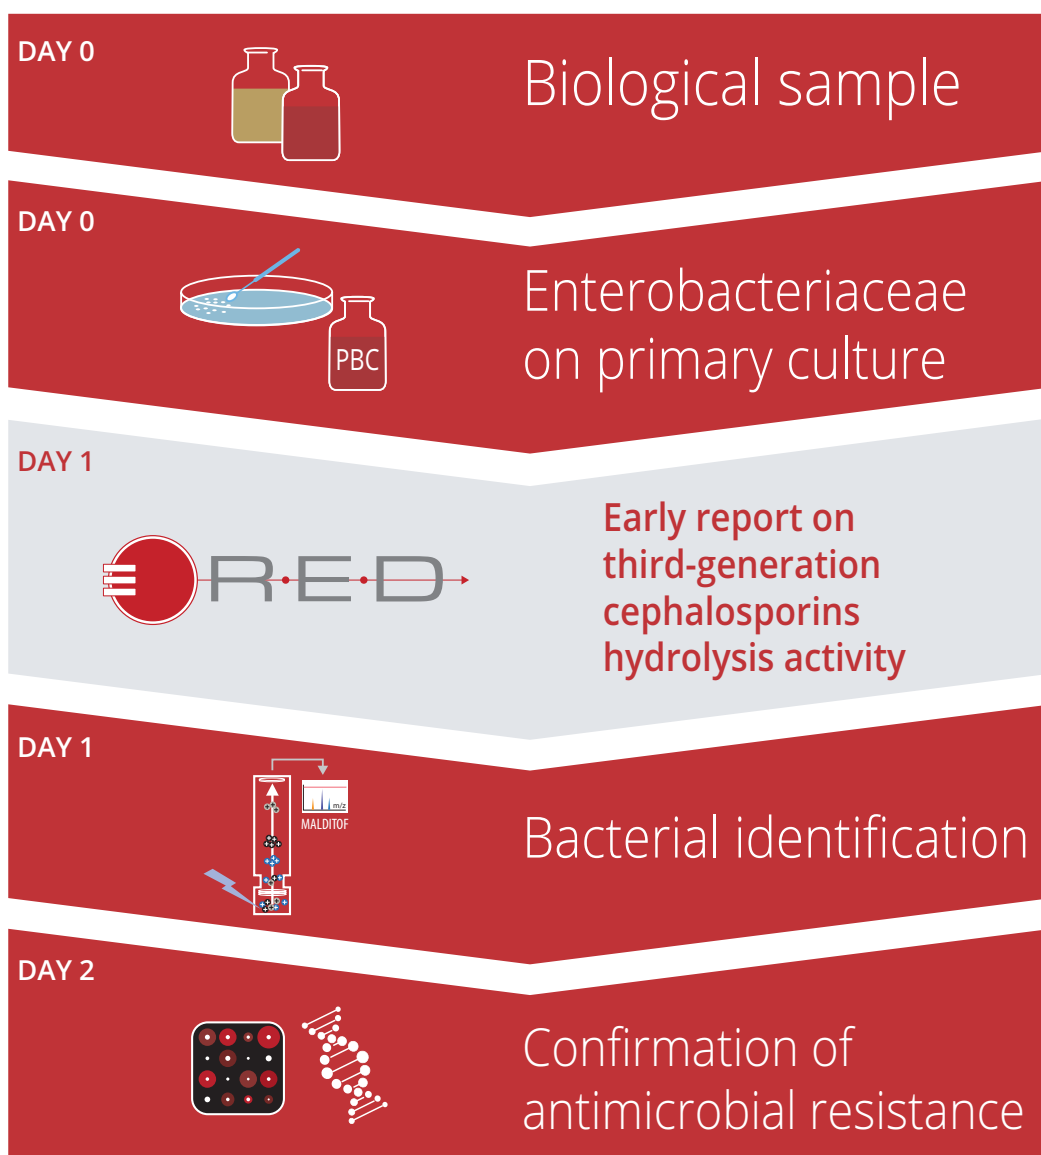

- Only 2 minutes hands-on-time
- Easy to use
- Automated objective results
- Traceability of results
- Compatibility with Mac Conkey, Mueller Hinton, Blood Agar, Positive Blood Culture
- Allows adjustment and streamlining of antimicrobial therapy 18-24h prior to laboratory susceptibility testing methods

Innovative solutions for effective diagnostics
